

What is Leather Care?

LEATHER CARE is a cleaner, conditioner and protector for fully-pigmented smooth leather surfaces.

Key Benefits

- ✓ Rejuvenates the leather having it soft and supple
- ✓ Contains beeswax and lanolin to moisturise the leather
- ✓ Increases the durability of the leather
- ✓ Provides resistance against stains, spots and spillages

How Does It Work?

LEATHER CARE is formulated with mild, biodegradable detergents so it cleans gently but effectively. As it dries, LEATHER CARE leaves a wax-rich film that impregnates the leather to both improve the sheen and moisturise the leather.

For Use On...

LEATHER CARE is excellent when used on fully-pigmented, smooth leather surfaces, such as are found in leather upholstery, jackets, handbags, suitcases, shoes, boots and fashion accessories.

Caution

LEATHER CARE is not suitable for use on suede, nubuck, fabrics, aniline – or unfinished – leathers. Always follow the manufacturers' instructions for cleaning leather items.

Technical Data

Properties

COLOUR – Milky white liquid
 ODOUR – Faint spicy perfume
 pH = 8.5 – 9.5
 COVERAGE: 100 – 200 sq meters per litre

Environmental Care

LEATHER CARE conforms with all statutory environmental requirements. It is based on selected ingredients to perform efficiently so there is no waste or damage. LEATHER CARE is water based, non-flammable and based on biodegradable surfactants. It is phosphate-free. LEATHER CARE containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd., significantly reducing plastic usage and waste. They can also be recycled.

Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

First Certified: 30 April 1996 SAI Certificate No.: QEC7358

Application

- Vacuum the leather to remove dust. Absorb any spillages with a sponge or paper towel.
- Shake the bottle before use.
- Test LEATHER CARE on a small, inconspicuous area first to ensure it is compatible and non-injurious to the colour. If the leather turns dark or the colour migrates onto your cloth, do not use this cleaner.
- If the test is OK, spray LEATHER CARE onto a clean cloth and wipe it evenly across the leather surface. Apply a generous uniform film that covers all areas. Use light, circular movements. Do not rub hard. Leave to dry, then polish lightly with a dry soft cloth.
- For best effect, use regularly. Once a month is ideal.

Helpful Hints

- Do not place your leather furniture too near a radiator or fireplace. There should be a minimum distance of 30cm between your furniture and a heat source.
- Avoid exposing your leather furniture to direct sunlight.
- Protect the leather from dust and dirt. Vacuum clean it regularly and clean with LEATHER CARE.
- In the event of an accident, consult your furniture dealer for the advice or the recommendations of a specialist. Never use solvents or aggressive chemicals, as these can strip the surface treatment and colours from the leather.

Disposal Information

1. Used solutions -

Used Solutions of LEATHER CARE should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste. Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rainwater and ultimately lead to the local river system.

Product Data Sheet

Product Code: LET

Issued: September 22, 2025

2. Unused product

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container).

If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the wastewater.

Remember, do not mix different cleaning products together during disposal!

3. Empty packaging

Bottles and drums

Our 5L and 20L bottles and drums are made from HDPE (polyethylene) or PET which can be recycled. You can dispose of these containers via the kerbside collection program or other recycling system. LEATHER CARE containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd, significantly reducing plastic usage and waste.

Cardboard cartons

Used boxes should be flattened and recycled in OCC (old, corrugated cardboard) or mixed wastepaper recycling programs.

Available in: 1L, 5L

Agar Cleaning Systems maintains Safety Data Sheets (SDS) on all its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Agar Cleaning Systems recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.
